## EC Alumnus Joins Instruction Squad

Willie Suzuki, former student president and art major at El Camino College, will return to his alma mater as an art instructor. Dr. William Harless, director of instruction at the college, announced today.

Suzuki, who served as student body president at El Camino in 1953 and transferred to Long Beach State to serve as that college's student body executive in 1955, has been an art teacher at Enterprise Junior High School in Compton since receiving his degree. He has also served in the U.S. Army for two years.

In addition to the top student executive post at the two colleges—a unique achievement in the history of the schools—Suzuki was also chosen Emperor at El Camino, an honor bestowed annually to an outstanding graduating student whose scholarship and qualities of leadership are acknowledged by the

Associated Students. In 1952 he was elected Associated Men Students president at the two-year school.

Suzuki's talents now center in the field of creative art; his oil paintings have been shown widely and he has won several awards in competition. Starting his instructional duties in September at El Camino, he will instruct classes in art appreciation, free-hand drawing and oil painting.

Suzuki joins a growing company of former El Camino College students who have returned to teach at their alma mater.

SARCASTIC COMEDIAN Mort Sahl, along with producer David Susskind, will interview candidates and delegates at the Democratic convention in Los Angeles Monday through Friday at 10:30 p. m., on Channel 9.

MARINELAND DIVER Jake Jacobs has just written a book about his numerous year below the surface of the sea. It's appropriately titled "Marineland Diver" and is on sale at all bookstores and at Marineland Gift Shops.

### CONTROVERSY

A classical scientific controversy on the question of whether white blood cells can change into various forms has been resolved by American Cancer Society research at the University of California Medical Center in San Francisco, where it has been shown that only two of several kinds of white cells lack the ability to transform into fat cells and into fibroblasts—the cells that spin the material that becomes the matrix for bone, muscle, and other solid structures of the body.
